

please reject the NAB's petition 04-160.....i'm a paying subscriber to XM radio and i prefer it to any of the broadcast offerings.....particularly the traffic & weather....i consider them to rise to the level of public service.....they are better than the broadcast offerings by far....please don't limit my ability to receive these channels....or any others provided by XM satellite radio service....by the way, i have it on my boat as well....i consider it a safety feature....thanks, max schindler.
